

PATCH PANEL SYSTEM

ABSTRACT OF THE DISCLOSURE

A patch panel system is provided that comprises a frame, a patch panel and connector ports. The patch panel is attached to the frame and has first and second connectivity interfaces. The first connectivity interface has multiple sections joined to form an N-sided portion of a polygon where N is greater than 2. The connector ports are provided at the first connectivity interface. The sections of the first connectivity interface have planar front surfaces that are oriented at obtuse angles to one another.
